Work Experience

Huntington National Bank, Remote

Programmer / Analyst 2 (ServiceNow Developer)

07/2022 - 07/2026

- Served as lead developer for the migration of Huntington's legacy IT Service Portal to the Employee Center, delivering a modernized, scalable digital experience.
- Took ownership of the Employee Center modernization initiative by leading status meetings, presenting feature demos, and proactively identifying opportunities to enhance user experience.
- Designed and implemented enhanced Employee Center features including a floating Get Support button, taxonomy-based navigation, self-service Virtual Agent chatbot, and other usability improvements to streamline employee experience.
- Ensured consistent branding, visual design, and content presentation across the ServiceNow platform while remaining in line with enterprise design standards.
- Partnered with business analysts, QA testers, UX designers, and cross-functional Agile teams to deliver intuitive, user-centered digital experiences.
- Led development of multiple enhancements within Service Operations Workspace using ServiceNow UI Builder creating secure, user-focused interfaces for internal support teams.
- Translated business needs into detailed requirements and supported QA efforts by creating test scenarios, validating workflows, and ensuring successful feature delivery.

Zoom Video Communications, Inc, Remote

Email Marketing Intern

06/2021 - 12/2021

- Developed responsive, cross-client HTML and CSS for global email campaigns.
- Built and tested dynamic onboarding sequences using SFMC and SendGrid.
- Conducted quality assurance testing across email clients to ensure responsive layouts and consistent user experiences.
- Collaborated with designers and engineers to implement A/B testing for improved engagement.
- Applied UX principles and data-driven design decisions to optimize campaign performance.
- Designed, reviewed, and built content to reflect Zoom's brand, voice, and digital guidelines.
